

SUBBARAMI REDDY K

Senior DevOps Engineer / Senior Platform Engineer / Site Reliability Engineer
Bengaluru, India — +91 7659993352 — ksramireddy11@gmail.com
GitHub — LinkedIn — Medium

Summary

Senior Platform Engineer/DevOps Engineer with 4+ years of experience designing, automating, and operating enterprise-scale cloud platforms across AWS, Azure, and GCP. Experienced in Kubernetes platform engineering, GitOps, Infrastructure as Code, CI/CD automation, Internal Developer Platforms (IDP), and Site Reliability Engineering. Proven track record in delivering zero-downtime Kubernetes upgrades, multi-cloud platform onboarding, developer self-service automation, cloud cost optimization, and large-scale platform reliability initiatives.

Core Skills

Cloud & Platforms:	AWS, Azure, GCP, Kubernetes, Docker, Backstage, Platform Engineering
Infrastructure as Code:	Terraform, CloudFormation, AWS CDK, Crossplane,
CI/CD & GitOps:	GitHub Actions, Jenkins, Harness, Argo CD, Helm, GitOps
Observability:	Prometheus, Grafana, CloudWatch, Fluent Bit
Security & DevSecOps:	Kyverno, Trivy, Checkov, GitLeaks, Qualys, SBOM
Developer Experience:	Internal Developer Platforms (IDP), Self-Service Automation, Access Governance
Languages & Systems:	Python, Bash, NodeJS, Linux, Networking

Experience

ADNOC, Abu Dhabi, UAE

Jun 2026 – Present

Senior DevOps Engineer / Platform Engineer

- Supporting enterprise Azure cloud platforms and DevOps operations for ADNOC, focusing on platform reliability, automation, and secure cloud infrastructure.
- Working with Azure DevOps, Kubernetes, Infrastructure as Code, CI/CD pipelines, and cloud platform services to support enterprise application delivery.
- Collaborating with cross-functional infrastructure, security, and application teams to automate deployment workflows and improve operational efficiency.
- Supporting production environments by monitoring platform health, troubleshooting infrastructure issues, and participating in operational activities.
- Contributing to cloud platform modernization initiatives, automation, governance, and continuous improvement of DevOps practices.

OneAdvanced, Bengaluru, INDIA

Feb 2023 – Jun 2026

Senior DevOps Engineer / Platform Engineer

- Owned and operated enterprise Kubernetes platforms on AWS EKS supporting CI/CD, developer tooling, security services, and production workloads across multiple engineering teams.
- Successfully planned and executed zero-downtime Kubernetes/EKS upgrades from v1.27 to v1.34, including add-on upgrades for VPC CNI, CoreDNS, kube-proxy, and Karpenter.
- Implemented GitHub Actions Runner Controller (ARC) on Amazon EKS to provide scalable self-hosted runners, improving CI/CD execution efficiency, workload isolation, and deployment reliability for engineering teams.
- Reduced cloud costs by 40–50% through Kubernetes autoscaling, Karpenter optimization, workload rightsizing, and infrastructure governance initiatives.
- Built and maintained reusable Terraform modules and cloud infrastructure standards across AWS and Azure environments aligned with enterprise governance and compliance requirements.
- Successfully onboarded multiple enterprise products end-to-end across AWS and Azure environments covering infrastructure provisioning, Terraform automation, CI/CD implementation, deployment automation, and production readiness activities.
- Designed and implemented Internal Developer Platform (IDP) self-service workflows integrated with AWS, Azure, GitHub, Jira, Confluence, Grafana, and enterprise tooling.
- Reduced developer onboarding and access provisioning timelines from days to minutes through secure self-service automation, governance controls, and access guardrails.

- Enabled secure access management across 300+ cloud accounts and 500+ users while significantly reducing operational dependency on ServiceNow and JSM processes.
- Migrated and standardized 50+ CI/CD pipelines using GitHub Actions and Harness NextGen reusable templates, improving deployment consistency and engineering productivity.
- Worked extensively on GitOps-based deployment strategies using Argo CD and Kubernetes-native deployment workflows.
- Led onboarding of Google Cloud Platform (GCP) within the organization, including landing zone implementation, governance standards, cloud account structure, and foundational infrastructure setup with IAC.
- Built disaster recovery solutions using Velero achieving less than 15-minute recovery objectives for critical platform services.
- Reduced MTTR by approximately 40% through observability improvements using Prometheus, Grafana, alerting optimization, and operational automation.
- Supported critical production incidents, operational escalations, troubleshooting activities, and platform reliability initiatives across enterprise environments.
- Implemented DevSecOps controls using Kyverno, Trivy, Checkov, GitLeaks, Qualys, and policy-as-code frameworks for Kubernetes and cloud infrastructure.
- Led security agent migration across 200+ virtual machines from Trellix to Qualys and Microsoft Defender, improving rollout efficiency and operational visibility.
- Designed and operated multi-tenant Azure SaaS infrastructure aligned with Azure Landing Zone standards and deployed workloads across multiple regions to satisfy high availability and compliance requirements.
- Developed automation and operational tooling using Python and Shell scripting to support platform engineering, incident response, infrastructure management, observability, and AI-assisted operational workflows.

Innovation & Applied AI in Platform Engineering

- Built AI-assisted Kubernetes anomaly detection and self-healing concepts using Prometheus metrics and machine learning techniques.
- Designed alert correlation and remediation recommendation workflows to improve operational efficiency and reduce alert fatigue.
- Developed serverless threat intelligence ingestion solutions using AWS Bedrock and STIX-compliant outputs.

Certifications

- Certified Kubernetes Administrator (CKA)
- AWS Certified Developer – Associate
- Microsoft Certified: Azure Developer Associate

Education

B.Tech in Computer Science, CGPA 9.1 – 2023

Technical Writing

- Published technical articles on DevOps, Kubernetes, Platform Engineering, AWS, Terraform, and Cloud Infrastructure on Medium and Hashnode.
- Medium: medium.com/@subbaramireddyk
- Hashnode: hashnode.com/@subbaramireddy
